Hi George,

Chapters 1-12 (out of 17) from "Outlier Detection in Python" by Brett Kennedy are ready for the third review with approximately 390 pages. More information about the book is available in the attached document.

The due date for submitting the feedback is **April 15th, 2024**. If you see that you won't be able to provide feedback, let me know as soon as you can!

The manuscript is available on the following link. You need to sign in with your Manning account to access it:

<https://livebook.manning.com/book/kennedy3/chapter-1/r-2>

The code is attached to this email.

You leave comments in the manuscript by selecting a word, sentence, or a paragraph and choosing the "Annotate" icon. Also, you can rate individual figures, listings, code snippets or sections by clicking "like", "don't like" or "neutral" icons below them and leaving the comment. While you read, or at the end of the review, **you should fill the manuscript review questionnaire** available at any moment on the following link:

<https://livebook.manning.com/book/kennedy3/chapter-1/r-2?review-form>

Please do not comment on typos, grammar/style errors, hand-drawn graphics, etc. The manuscript will be copy edited, proof read and typeset in the later stages of production.

By accessing the manuscript you agree that you will not duplicate it or use the material to create a similar book nor discuss its contents with potential authors of similar books until this book is published or canceled.

We are making all reviews anonymous to obtain more constructive comments. Your review will be made anonymous prior to submitting to the author.

We -- that is the publisher and the author -- appreciate your assistance in making this book as useful as possible to its readers.

Kind regards,

Radmila Ercegovac
